Managing Your Child's Diabetes at Home

At today's visit, the health care provider talked with you about managing your child's Type 1 Diabetes. Here's what you need to know to keep your child healthy at home.

Blood Sugar Monitoring:

- Check your child's blood sugar as directed by your health care provider (usually before meals and at bedtime).
- Keep a log of all blood sugar readings to share with your health care team.
- Know your child's target blood sugar range.

Insulin Administration:

- Give insulin exactly as prescribed by your health care provider.
- Rotate injection sites to prevent lumps under the skin.
- Store insulin properly (refrigerate unopened insulin; opened insulin can be kept at room temperature for up to 28 days).
- Never skip insulin doses.

Signs of Low Blood Sugar (Hypoglycemia):

- Shakiness, sweating, pale skin
- Hunger, irritability, confusion
- Dizziness, headache
- **Treatment:** Give 15 grams of fast-acting sugar (4 oz juice, 3-4 glucose tablets), wait 15 minutes, recheck blood sugar.

Signs of High Blood Sugar (Hyperglycemia):

- Increased thirst and urination
- Fatigue, blurry vision
- Nausea, fruity breath odor

Sick Day Rules:

- Never stop giving insulin, even if your child isn't eating.
- Check blood sugar more frequently (every 2-4 hours).
- Check for ketones if blood sugar is over 250.
- Encourage fluids to prevent dehydration.

Call your health care provider if:

- Blood sugar is consistently above 300 or below 70.
- Your child has moderate to large ketones.
- Your child is vomiting and can't keep fluids down.

Call 911 if:

- Your child is unconscious or having a seizure.
- Your child is confused and unable to drink.

How To Monitor, Secure, And Destroy Your Medications

Preventing prescription drug abuse starts in your home. According to the U.S. Drug Enforcement Administration, more people die from over-the-counter and prescription drug abuse than from cocaine, heroin, and ecstasy combined. Safeguard your family by following these steps.

MONITOR

Take inventory. Count your medications from the pharmacist. Count them as you use them. Take note of missing and quickly used medications.

SECURE

Lock Medications and reduce access. Don't leave them in a bathroom. Keep them away from children and youth.

DESTROY

Never dispose of medications in a sink or toilet. Dissolve unused or expired medications in a baggie with kitty litter.

How To Properly Destroy Your Expired And Unwanted Medications At Home

What You Will Need:

- Expired and unwanted medications
- Zip baggie
- Hot water (over 110°F)
- Kitty litter

Steps To Follow:

- 1) Pour unwanted/expired medications out of their original containers into a zip baggie.
- 2) Pour hot water (over 110°F - about as hot as a cup of coffee) into the baggie.
- 3) Insert kitty litter into the baggie. Seal baggie. Place in trash bin.

Shred prescription labels or use a black marker to cross out label information.

How to Address Your Child's Discomfort and/or Pain While at Home

Your healthcare provider will tell you if your child will need any medication for discomfort and/or pain while at home.

There are many other ways you can help keep your child comfortable without using medications or with using less medications.

If okay with your healthcare provider, this can include:

- Use of cool and/or warm packs
- Help your child change position in bed or chair
- Encourage your child to be up in a chair or walking
- Massage your child's feet, hands, and back with lotion
- Distraction; such as art, crafts, music, TV/videos

CHOC Link and COVID-19 Resources

CHOC Link is an online tool to manage your child's medical records and communicate with your providers and clinics. If interested in getting access, please provide a valid email address to your CHOC provider office or to the Admissions Department, and we'll send you an invitation to create your account. To learn more, go to www.choc.org/choclink.

Please visit 'Coronavirus (COVID-19): A Resource for Parents' at choc.org/coronavirus for frequently asked questions and up to date information from Centers for Disease Control and Prevention, Orange County Health Care Agency, California Department of Health, and CHOC Children's including visitor information.

If you have questions about your child's health and COVID-19, call our 24/7 Nurse line at **1-844-GET-CHOC**.
